

# Hexham Heads

Original title: Hexham Heads

In 1971, a family living in the town of Hexham was plagued by a series of paranormal events. After bringing a pair of small stone heads into their home, the family became terrorized by the ghostly sounds and images these objects exerted. *Hexham Heads* adopts an impressionistic approach to this contemporary folk tale. Using the story as a point of departure, the film guides us through a multitude of spaces in which time and matter become frozen, stretched, and repeated. A darkroom, an apartment, a house, a warehouse for construction materials, are all connected and portrayed through the spectral lens of photography.
