

Kopschuif

Original title: Kopschuif

In Bas's world, the voices desperately trying to contact him amount to little more than background noise. Sometimes they breach the decaying rooms he inhabits, but they fail to break down the walls surrounding him. That leaves Bas adrift in a twilight zone between delusion and reality, between response and isolation. Kopschuif is a unique collaboration between Roel Goyens and activist theatre company Tartaren. Informed by the psychiatric past of its actors and many conversations with specialists, the director submerges the audience in a surreal world that for some tormented souls might be grim reality. In a place where communication is a challenge, Kopschuif encourages a debate that brings together the patient, mental therapists and the film's audience.
